

# **Lyric-based recommendation for music playlists**

# Word Embeddings

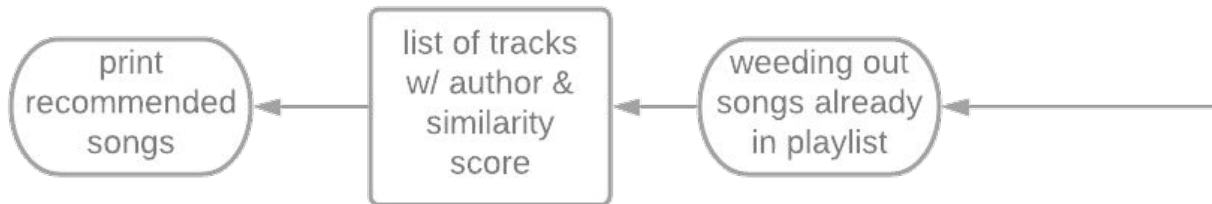

TF-IDF, Doc2Vec, SBert.

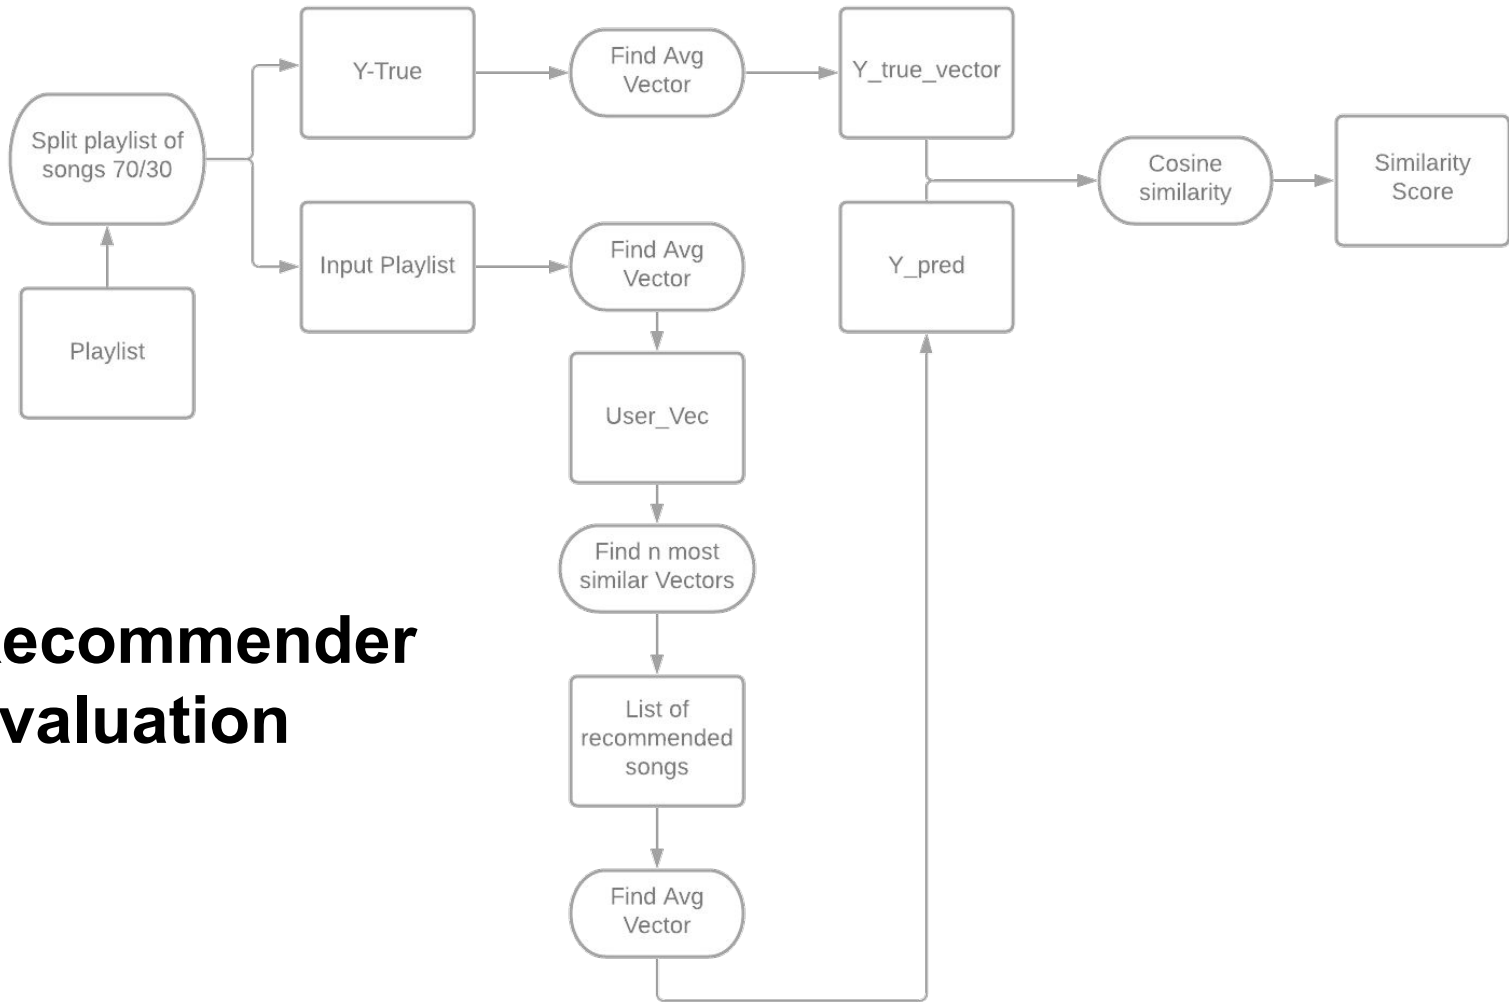

# Intersected Dataset of songs with lyrics and playlists

## The Recommender Algorithm

# Recommender Evaluation

# Conclusions

As corporations become better and better at recommending content that will keep a user in a informational echo chamber, is there a corporate responsibility to ask, what is goal with this,

# Ethical Considerations

As corporations become better and better at recommending content that will keep a user engaged, is it corporate responsibility to ask whether this may stop a user from developing and growing as a whole.
